What Did Jack Gain? What Did Jack Lose?

Don and Jack are good friends.
They lend toys and books to
each other.

One day Don wanted to read
Jack's book. Jack wanted to
read Don's book.

Don said, "Let us read each
other's book."

Jack said, "Good." And so
they did.

The next day Don gave Jack's
book back to him.

But Jack did not give back
Don's book. He kept Don's book.
He never gave it back.

Don does not want to lend
Jack any more books.

Now Jack cannot read Don's
books. And Don cannot read
Jack's books.

The Plumber Who Did Not Come

One day a water pipe broke in this house. A lot of water came out. There was a big puddle on the floor.

Mother had to turn off the water. Then she called a plumber.

The plumber said he would come right away.

So the family waited and waited. But the plumber never came.

The family had to go without water.

How the Grocer Gets Food

This man is a grocer. He owns a grocery store. He sells many kinds of food.

The food comes from many places. Some comes from places that are near. Some comes from places that are far away.

How does the grocer get this food? He has to order it.

He orders some food from a man who comes to his store. He orders some food by telephone. He orders some food by letter.

The food is sent to him in many ways. Some food is sent by truck. Some food is sent by train. Some food is sent by airplane.

The grocer knows he will get the food he orders. So he always has the food people want.

What would happen if the food were not sent? The grocery store might have a lot of food one day. It might have no food the next day.

People would not know what food they could find. Then they could never plan their meals.

How Producers Changed

Long ago most families lived on farms. Fathers did not work away from home.

Families grew their own food. They made their own clothes. They made their own houses. They worked very hard.

Then some men made new farm machines. The new machines made work easy. Farmers could work faster and better.

After a while, better machines were made. Then the factories could produce more goods faster and better.

The new machines did the work of many men. Not so many workers were needed in the factories anymore. Men had to look for other jobs.

Some men went to work in stores. Some men went to work in offices. Some became doctors. Some became truck drivers. Some learned to fly airplanes.

Now many services are produced. Now we have many new jobs.

Where the Banana Trees Are

One day Carl was eating a banana. He said to his father, "Daddy, where are the banana trees? We have apple trees, pear trees, and plum trees in our yard. So I know where they are.

"But we also have lots of bananas in the stores. Why have I never seen a banana tree?"

"Well," said Father, "there are no banana trees near us."

"Then why do we have so many bananas?" Carl asked.

Father laughed. "We have so many bananas because many people work hard to bring them to us. Bananas grow in a land that is far, far away. It is very hot there, and it rains a lot.

"The bananas are grown on big farms. Each tree has one big bunch growing on it.

"The bunch is cut off the tree.
Then it is put on the back of a
donkey. The donkey carries the
bananas to a small train.

"The train takes many bunches
to a town by the sea. There
the bananas are put onto a
big boat.

"The boat makes the long trip
by sea to our country.

"When the boat gets here, the
bananas are taken off. They
are put on a long train. This
train has cars that keep the
bananas cool.

"The train takes them to our
city. Then they are put into a
big building.

"The next day a man from our grocery store comes to that building. He picks out the bananas he wants. He puts them on his truck and takes them back to the store.

"Then we can go to the store and buy bananas."

"Oh," said Carl. "Now I know why we have so many bananas. And I know why I have never seen a banana tree."

Mr. Baker had a bad tooth. It hurt very much. He hoped someone would fix it.

He said, "I will pay ten loaves of bread to get my tooth fixed."

Mr. Fixit came by with a hammer and saw. He was very hungry. He said, "I want a loaf of bread. I shall make you a table. That will pay for the bread."

"I do not need a table," said Mr. Baker. "But I will give you ten loaves of bread if you fix my tooth."

"I cannot fix your tooth," said Mr. Fixit. "My hammer and saw cannot fix your tooth."

Mr. Fixit had to go away without any bread. Mr. Baker's tooth still hurt.

Just then Mr. Dentist came running down the street. "My chair is broken," he said to Mr. Fixit. "I will fix your tooth if you will fix my chair."

"My tooth does not hurt," said Mr. Fixit. "I am hungry. I want some bread."

"But I do not have any bread," said Mr. Dentist.

Then Mr. Fixit had an idea.
He fixed Mr. Dentist's chair.
Then he and Mr. Dentist went
to see Mr. Baker.

Mr. Dentist fixed Mr. Baker's
tooth. Mr. Baker gave Mr.
Dentist ten loaves of bread.

Then Mr. Dentist gave Mr.
Fixit five loaves of bread for
fixing his chair.

Then they all were happy.

Lesson
16

Why There Are So Few Blacksmiths

Long ago there were no cars or trucks. People rode in carts and wagons then.

The carts and wagons were pulled by horses. The horses had to wear horseshoes. The horseshoes kept their feet from harm.

The horseshoes were made by men called blacksmiths. A blacksmith had to make iron red-hot. Then he had to hammer the iron.

Soon it was a horseshoe. Then he nailed it onto the horse's foot.

The blacksmiths also fixed the carts and wagons. There was a lot of work for blacksmiths to do.

Soon there were many carts and wagons on the roads. More and more blacksmiths were needed.

To get blacksmiths, people paid them a lot of money. The blacksmiths were paid more than men who did other jobs.

Soon many men left other jobs to become blacksmiths. They wanted to make more money. There was still more work than all the blacksmiths could do.

As time went by, cars and trucks were made. The cars and trucks were faster than horses and wagons.

The cars and trucks could also carry more than wagons.

People used cars and trucks more and more. They used horses and wagons less and less.

Then there was less and less work for blacksmiths. They were paid less money.

But now there was a lot of work to do on cars and trucks. A man who knew how to fix cars and trucks got good pay.

Not many men wanted to be blacksmiths anymore. More and more men got jobs fixing cars and trucks. These new jobs paid well.

Today not many men want to be blacksmiths. Many men like to work fixing cars and trucks.

This is why we have so few blacksmiths.

What Will Happen?

Pat Draws a Picture

Pat was in a girls club. All her friends were in the club too. They played games. They told stories. They took trips. They had a lot of fun.

The club had its own room. It was a big room. But the room was not very pretty.

One day Mary said, "Let us make our room pretty. Let us make a picture to hang on the wall."

"That will be fun," said Pat.

"Who will draw the picture?"

"I know," said Susan. "Let us each draw a picture. Then we can have Miss Gray pick the best one."

"But what shall we put in our pictures?" asked Pat.

"I know," said Mary. "Let us draw pictures of the club's flower garden. We have flowers of many, many colors in our garden. We can make pretty pictures."

"But what can we draw our pictures with?" asked Pat.

"I know," said Susan. "Let us use crayons. The club can buy them. The club can give each girl 25 cents. Then each girl can buy her own crayons."

Then Pat took her 25 cents and went to the store. She wanted to draw the best picture. She wanted her picture to hang on the wall.

She saw two boxes of crayons in the store. She saw a big box and a little box. She took the big box.

Just then she saw some funny books. "I shall get a funny book, too," she said.

The man said, "The funny book costs 10 cents. You have only 25 cents. The big box of crayons costs 25 cents. What do you want to buy?"

"I want the funny book," said Pat. "And I will get the little box of crayons. It costs only 15 cents."

Then Pat went home. She made her picture. But she did not have many colors for her picture. She had only the small box of crayons.

The next day Miss Gray looked at all the pictures. She said, "Pat, you do not have many colors in your picture. Your picture is not very pretty."

Pat went home. She was very sad. She did not look at her funny book. She did not think it was funny anymore.

What Do Taxes Do?

Fred and his family had just had dinner. Fred said to his father, "Dad, can you take me to the ball game?"

"I am sorry, Fred," said Father. "I must stay home. I must pay my taxes soon. So I have to add up what I must pay."

"What are taxes?" Fred asked.

"Well, Fred," said Father, "there are many things that we get from our city, our state, and the United States. The things we get are things that all families buy together. When families pay taxes, they are buying things together."

"We pay taxes to our city. So do all the other families who live in our city. That is how all the families buy together the things we get from our city."

"Our city uses the tax money to pay the policemen and firemen. Our city uses tax money to pay for your school and all the teachers."

"Our city also uses the money to build roads and streets. That is how we are able to get all the things we need."

"Does our city do all this with our taxes?" Fred asked. "Why do you pay taxes to the state?"

"Well," said Father, "all the families in our city buy together the things we need in our city. But we also need things that our cities cannot do."

"We go from our city to other cities. But our city cannot build roads to cities that are far away. So our state builds those roads.

"Some boys and girls in our city want to be doctors. So our state has a school just for doctors. Boys and girls from our city, and from many other cities, go there.

"There are many pretty parks that we use for playing and swimming. But they are not in our city. So our state makes these parks for the people from many cities.

"All our families want to use these things. So we all pay taxes to our state. It uses the taxes to make these things."

"Oh," said Fred. "Then why do you pay taxes to the United States?"

Father said, "There are many things that are so big that our city cannot do them. They are so big that even our state cannot do them."

"I know one," Fred said. "Building a spaceship!"

"Yes, Fred," said Father. "Building a spaceship is a great big job. Only the United States can do it. Making an army, navy, and air force is also a very big job. So the United States takes care of that, too."

"There are many other jobs that are too big for our state. Many goods are made and sent all over the United States. People have to know that all the food and other things are clean and safe. So the United States has men who look at all these things. These men make sure everything is all right.

"The taxes we pay to the United States pay for all these things."

"Oh," said Fred. "There are many jobs that our city, our state, and the United States do. I see why all our families have to pay taxes. That is how we pay for all these things together."

Helen Helps All Our Families

Here is Helen. She works for the people of our state. She helps sick people get well. She helps people who are well to stay well.

Helen finds out when mothers are going to bring their new babies home. Then Helen goes to visit them. She sees if the babies are well.

She shows the mothers how to take care of the babies. She tells the mothers what to feed the babies. She knows what foods make the babies happy and keep them well.

Helen also visits the homes of old people who need help. She takes care of them.

Helen visits schools. She sees if any children are sick. If they are sick, she sends them home.

Some mothers bring children to Helen's office. Helen gives them shots.

Helen also works in a clinic. Mothers and fathers come to the clinic when they are sick. Helen tells them how to get well.

Helen is a nurse. Other nurses work with Helen. They work hard for the people of our state. They are paid from taxes. The people of our state pay the taxes.

There was a little boy called Peter the Eater. He ate all the time, and he was very fat.

When his father gave him money, he spent it on candy. This made Peter much fatter. At school nobody would play with Peter the Eater because he was so fat.

One day Peter said to his father, "Will you buy me a dog? Then I will have someone to play with."

His father said, "I give you money every week. If you save your money, you can buy a dog by yourself."

Peter said, "If I save my money, I cannot buy candy."

His father said, "What do you want most of all? Candy or a dog?"

Peter the Eater wanted a dog more than he wanted candy. For many months he did not buy candy. He saved his money, and he got very thin. Now the children at school played with Peter, and he was happy.

But he still wanted a dog. So every time he saw a candy shop, he closed his eyes. He said, "I want a dog most of all."

Then the day came. Peter the Eater had the money he needed. He went with his father to the pet store. There he saw a big brown dog. It jumped up and down when it saw Peter.

"There is my dog," said Peter, and he took the dog home.

His father said, "You are a good boy, and I am proud of you. What will you call your dog?"

"I will call him Candy," said Peter the Eater.

Danny's Bicycle

Danny was a very happy boy. He had many toys. His father gave him some money every week. Danny used the money any way he liked.

But Danny did not have one thing. He did not have a bicycle. He wanted a bicycle very much. He wanted to ride to school on it.

One day Danny said to his father, "Father, school is so far away. If I had a bicycle, I would not have to walk at all. Then my shoes would last a lot longer. We would save lots of money on shoes."

Father said, "Yes, Danny, you would not use your shoes as much. But a bicycle costs much more than shoes. I have an idea. Save the money I give you every week. Then you will be able to get a bicycle."

Danny said, "Yes, Father, that is a good idea. It will take me a long time to save the money. But I will do it."

1910 JUNE 1913

	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30				

The next day Danny was on his way home from school. He stopped at the candy store. He looked at the candy. Then he saw a boy on a bicycle. "No," he said, "I will not get any candy."

Then Danny came to the toy store. He saw a pretty truck in the store. But he said, "I have a truck like that at home."

Then Danny saw a man selling balloons. The man said, "How about a balloon?"

"No," said Danny. "I do not want a balloon. What is a balloon? Just a bag full of air. Stick it with a pin and what do you have?"

The next day Danny saw a man selling ice cream. "Oh," said Danny. "I like ice cream. But in one gulp the ice cream is gone."

Then Danny came to another store. There he saw a bat and ball. "Geel!" he said. "There is a bat just like the one that Bill has. It is very nice. But I do not have to have everything that Bill has."

Next to the bat and ball was a toy airplane. "Oh," Danny said. "That is a pretty airplane. But I cannot ride to school on it."

Next to the toy airplane was a football. "Well," said Danny, "I can use a new football. But I shall make my old one last. I have to."

So day after day, week after week, month after month, Danny put his money away. He did not spend any of it.

One day Danny added up all his money and said, "Now I have all the money I need. Today I shall get my bicycle."

So Danny and his father went to the store and got the new bicycle.

Danny was proud of his bicycle. But Father was even prouder of Danny.

Tony and the Banker

Tony and his brother went to the bank.

His brother said, "Many, many people put money in this bank. The bank keeps it safe for them."

"The bank must have rooms and rooms full of money," said Tony. "I hope we can see all the money."

At the bank Tony saw some tables and chairs. He saw lots of people. He saw a room with a big, big door.

Then Tony and his brother saw Mr. Banker. He was going to tell them about the bank.

Mr. Banker took them into the room with the big door. "This is where we keep the money," he said. But Tony did not see much money.

"Where is all the money?" he asked. "Did you lose it?"

"No," said Mr. Banker. "We did not lose it.

"But we do not keep all the money here. What good are rooms full of money? We use the money to help other people."

"Do you give away the money that people put in the bank?" asked Tony.

"Oh, no," said Mr. Banker.

"We only let other people use it. Then they have to pay it back. They pay back a little bit more, too."

"Do you get to keep the little bit more?" asked Tony.

"We keep some of it," said Mr. Banker. "We give some of it to the people who save, too."

"But what if the savers want all their money? And what if someone else is using it?" asked Tony.

"Oh," said Mr. Banker, "that is why we keep some money here. But not all the people want their money at the same time."

"Look at these two pennies,"
said Mr. Banker.

Tony looked at them.

"Do they look alike?" asked
Mr. Banker.

"Yes," said Tony.

"Money is like that," said Mr.
Banker. "One penny looks just
like another penny. And one
dollar looks just like another
dollar."

"That is why we can give a
saver the money he wants. The
saver does not need the same
pennies or the same dollars he
put in the bank. That is why
money is so easy to use."

"Now I know why a bank does
not have much money," said
Tony. "The bank uses the money
to help people. But I wanted so
much to see a room full of
money."

A Visit to the Bakery

"My father works in a store," said Linda. "He goes away every morning. He comes home at supper time. What does your father do?"

Ann said, "My father works too. But he comes home in the morning. He goes away to work after supper."

"He is a baker. Bakers work while we sleep. In that way, the bread and rolls they make are fresh in the morning."

"My father is going to take me to his bakery. I want to see how the bakers work. Do you want to come along?"

"Oh, yes," said Linda.

The next day Linda, Ann, and Mr. Gray went to the bakery. They went down many streets. It was getting dark.

Ann said, "Here is the bakery. My father and the other bakers work here."

They went into the bakery. It was very warm in there.

Linda saw that all the men wore white coats, white pants, and white hats.

Mr. Gray said, "Wait here. I shall be back soon." He went into another room. Soon he came back. He wore a white coat, white pants, and a white hat too.

Mr. Gray said, "Now I shall show you how we make bread."

"Here are the things we use for bread. We use flour. We use water. We use milk. We also use many other things."

"This is a mixer. We put all the things into the mixer."

"Oh," said Linda, "does bread come out from the mixer?"

"No," Mr. Gray said. "When it comes from the mixer it is still raw. It must be baked first."

"See, Linda, there is a man baking some bread. He is putting it into little pans. Then he will put the pans in the big oven."

"Oh, good," said Linda. "Let us wait until the bread is baked."

At last the bread was done.
The man took it out of the oven.
It was very hot. It was nice and brown.

He gave each girl a loaf of bread. Linda asked, "May I take it home?"

"Yes, you may," said the man.

"Now," said Mr. Gray, "it is very late. You girls have to go home to bed.

"A truck is going to take some bread to a store. The man will give you a ride home."

"This was fun," said Linda.

"Someday my father will take us to the store where he works."

Find the Bakery

Why Is the Owner Worried?

Mr. Tweed and the Moth

Here is a factory that makes coats. Many people work in the factory. They work to make coats for you and for me.

Mr. Tweed owns the factory. Mr. Tweed is worried. There is a moth in the factory. A moth eats cloth. And cloth is used to make coats. The cloth will be no good if the moth eats holes in it.

Mr. Tweed ran to a little woman. She was thinking up new kinds of coats.

"Have you seen the moth?" asked Mr. Tweed.

"Yes," she said. "The moth flew into the room over there."

Mr. Tweed ran into the other room. A man was busy making pictures of the coats. The pictures showed other workers how to make them. Mr. Tweed asked the man if he had seen the moth.

"Yes," said the man. "It flew to the other end of the room."

Mr. Tweed ran over to a big man. The man was cutting some cloth. Now Mr. Tweed was very worried. There was a lot of cloth in the cutting room.

"Have you seen the moth?" asked Mr. Tweed.

"Yes," said the man. "I almost cut its wings off. Then it flew into the sewing room."

Mr. Tweed was puffing. He ran into the sewing room.

Workers were sewing the parts of the coats together. Some workers were sewing with needles. Other workers were using sewing machines.

Mr. Tweed asked them if they had seen the moth.

"No," they said.

Just then another worker ran in. He was the man who put the coats into boxes.

"The moth flew into one of my boxes," he said.

Everyone in the factory ran to see the moth.

Mr. Tweed looked into the box.
Out flew the moth!

"Oh! Oh!" said Mr. Tweed.

Then Mr. Tweed smiled. Then he laughed. Soon all the workers were laughing. Why, it was not a moth after all.

It was a pretty butterfly.

Find the Clothing Factory

Father came home from work.
Just then Bobby ran into the
house.

"Come and see," he said.

"Come and see what I did."

Father went out to the
backyard. "What a pretty
doghouse," he said. "Did you
build it?"

"Yes, I did," said Bobby. "And
do you know what? Mr. Day
wants me to make one just like
it for him."

Bobby worked very hard all week. He made another doghouse for Mr. Day. Mr. Day gave him five dollars for it.

Soon more people wanted doghouses. They asked Bobby to build them.

Then Bobby went to his father.

"I have to build a lot of doghouses," said Bobby. "Maybe I can get some other boys to help me. I can pay them for their work."

"That is a good idea," said Father.

"I need more tools, too," said Bobby. "I need another hammer, and a saw, and a new paint brush.

"I have to buy some more wood, too," said Bobby, "and some nails, and some paint."

"How will you pay for all that?" asked Father.

"Well, Dad," said Bobby, "can you give me some money? I will pay you back after I sell more doghouses."

"All right," said Father. "I know that you will pay me back soon."

"But where will you work?" asked Father.

"Mr. Hill will let us use his old shed," said Bobby.

The next day Bobby and three helpers went to work. One boy cut the wood. Another boy nailed the parts together. The other boy put the paint on the doghouses.

Bobby showed them what to do. Then he went to sell more doghouses.

At the end of two weeks Bobby went to his father. "Here is the money you gave me. I have sold a lot of doghouses. I have paid my workers.

"And I have some money left over, too. Now I can buy a new bicycle."

Find the Builders

One day Jack and his friends went to Mr. Sweet's candy store. They saw that Mr. Sweet had a lot of new candy.

Jack got some of the new candy. It was very good. Jack's friends got some of the new candy. They ate it. They liked it too.

They told more children about the new candy. Soon many boys and girls came to the store. They all wanted the new candy.

Mr. Sweet sold all the new candy that he had. So he called Mr. Seller. Mr. Seller was the man who sold candy to the candy store.

But Mr. Seller had no more candy left to sell. The new candy was all gone. So he called Mr. Maker. Mr. Maker owned the candy factory.

Mr. Seller told Mr. Maker that all the new candy was sold. The candy factory had to make more candy.

Mr. Maker wanted to make more candy. But he needed more cocoa. The cocoa was used for making candy.

Mr. Maker went to a land far, far away. That is where cocoa is grown.

The people who grew the cocoa sold more cocoa to Mr. Maker. Mr. Maker then made more candy. He sold the candy to Mr. Seller.

Mr. Seller sold the candy to Mr. Sweet. Mr. Sweet sold more candy to Jack and the other children.

So all those people were happy. The people who grew cocoa sold a lot more cocoa. Mr. Maker, Mr. Seller, and Mr. Sweet all sold more candy. And it was all because of Jack and his friends.

The Sad Cow

One day Jack said to his friends, "I do not like ice cream anymore. Do you?"

The other children said, "No, we don't. We are all tired of ice cream. We shall not eat any more."

Then Mr. Green came down the street. He sold ice cream from a truck.

Mr. Green said, "Do you want some ice cream today?"

Jack and his friends said, "No. We do not want any more ice cream."

So Mr. Green did not sell any ice cream. He went back to the ice-cream factory. He wanted to talk to Mr. Brown.

Mr. Brown owned the factory. Mr. Green said, "The children are tired of ice cream. So do not send any more ice cream to me."

Mr. Brown went to the farmer. He said, "Do not bring us so much milk. We are not making much ice cream anymore."

The farmer said to his cow, "This is bad. I have to feed you. But I cannot sell much of your milk anymore."

The cow saw that the farmer was sad. Then the cow was sad too.

The people in the factory did not make much ice cream. So they were sad.

The ice-cream man did not sell much ice cream. So he was sad.

Then Mr. Green went back to the factory. He said, "The children do not like our ice cream. But we have to sell ice cream. What can we do?"

Mr. Brown said, "Maybe we can make a new kind of ice cream. Then the children might buy ice cream again."

Mr. Brown worked all night. Many helpers worked with him. The next day Mr. Green came back.

Mr. Green said, "Did you make a new kind of ice cream?"

Mr. Brown looked very tired. But he also looked very happy.

"Yes, we did," said Mr. Brown.

"Here. Eat some of it. We are going to call it mint nut."

"This is very good," said Mr. Green. "I think the children will like it."

Mr. Green put some mint nut ice cream in his truck. Then he went to find the children.

The children liked the mint nut ice cream very much. They were very happy.

And Mr. Green was happy. And Mr. Brown was happy. And the farmer was happy. And the cow said, "Moo."

What Shall I Be?

Tim got out of bed. He was still tired. But he had to go to school.

He went to get something to eat. "Bring the milk in, Tim," said Mother.

Tim went out. Just then the milkman came. He gave Tim some milk and butter.

"I would like to be a milkman," said Tim. "Then I could have a big truck. And I could take milk to many boys and girls."

After he ate, Tim left for school. "Goodbye," said Mother. Tim went out the door.

Then he saw the mailman. "I would like to be a mailman," said Tim. "Then I could carry letters from far away."

Tim walked on. Just then a red fire truck came by.

"Wrrrrrrrr," it said.

"I would like to be a fireman," said Tim. "Then I could put out big fires."

At last Tim got to school. He learned a lot that day.

"I would like to be a teacher," said Tim. "Then I could help boys and girls learn to read and write."

After school Tim went to the doctor. He had to get a shot.

Tim walked down the street with his mother. He saw an airplane flying in the sky.

"I would like to be an airplane pilot," said Tim. "Then I could fly like a bird. I would see places that are far, far away."

Mother took Tim in to the doctor. The doctor gave him a shot. It did not hurt too much.

"I would like to be a doctor," said Tim. "Then I could help boys and girls stay well."

That night Tim talked to his father. "What shall I be when I grow up?" he asked.

Tim's father looked at him.

"Well, Tim," he said, "you can be anything you want. But first you must go to school."

"At school you can learn many things. I hope you learn a lot. Then you can be what you want."

It was raining. The wind blew very hard. Jane, Betty, and Ted ran home from school.

Jane said, "Let us hurry home. I want to read some more in my book."

Betty said, "Yes, let us hurry. I want to play with my new doll."

Ted said, "I want to color in my new book."

They ran into the house. Where was Mother? They did not see her.

Jane said, "Maybe she is taking care of Larry."

Then they went to look for Mother. They found her in bed. Mother sat up.

She said, "I do not feel well. I have a bad cold. But I will get up soon. I have to feed the baby. Then I will try to make supper. You can play until I get up."

"Everything will be all right," said Jane. They went out of the bedroom.

Jane had an idea. So did Betty and Ted. They had the same idea. "Let's help Mother," they said.

Jane said to Ted, "You take care of Larry. He will wake up soon. You can play with him."

Then she said to Betty, "Can you warm Larry's milk? We must feed him soon."

"I will make supper for the family."

Jane put a pan on the stove. She put the food in the pan. Then she turned on the stove.

Ted came in. He said, "Larry is awake. He wants his milk. Is it warm yet?"

"Yes," said Betty. "I will feed him. You can set the table."

Then Father came home. He said, "Hello, Jane. Hello, Betty. Hello, Ted. Where is Mother?"

Jane said, "Mother is sick. We have fed Larry. We made supper, too."

"Good," said Father. Then he went to see Mother. He asked her, "How do you feel?"

"I feel better," she said.

Father said, "The children have been a big help. They have fed Larry. And they have made our supper."

Mother said, "What a nice thing to do!" She got up and went to the table.

She said, "Children, you have done a very nice thing. And nobody asked you to do it. That makes me a very happy mother."
